EXPERIENCE

Associate Software Developer Intern TechFactors Inc. Sikatuna Village, Quezon City	January – March 2026
- Developed and enhanced UI components using React.js and Bootstrap to improve system usability and responsiveness. - Integrated RESTful APIs and resolved front-end bugs to ensure smooth data flow and functionality. - Contributed 30+ contributions on GitHub, supporting feature development, bug fixes, and overall project progress.	

PROJECTS

Project Manager ESSSS Centralized Document Management System with QR code and IOT	November 2025
- Led a 5-member thesis team across the full software development lifecycle, overseeing planning, task delegation, progress monitoring, and coordination with stakeholders to ensure on-time system delivery. - Performed system analysis, requirements engineering, documentation, front-end support, UI/UX designing and system testing for a centralized document management system integrated with QR code and IoT technology. - Conducted stakeholder interviews and translated business requirements into system diagrams, workflows, and structured technical documentation. - Researched IoT hardware components and connectivity options to support the implementation of a web-controlled locking mechanism for physical document storage. - Achieved a 93% overall UAT pass rate, combining 97.54% web application validation and 88.89% web-controlled locking mechanism validation during user acceptance testing.	
Back-end Developer Online Quiz Web Application - Python (Django), SQLite	2025
- Designed and implemented a relational database using SQLite to manage user accounts and quiz score records. - Developed backend functions in Django for user registration, authentication, and score processing.	
Full-Stack Developer Medicare Billing System – Java, MySQL	2023
- Developed front-end interfaces and backend modules for patient billing, payment processing, and record management. - Designed MySQL database schema and wrote SQL queries for data insertion, retrieval, and validation.	
Back-end Developer Snake and Letters Game – Java, MySQL	2024
- Designed MySQL database tables and implemented SQL queries for player data storage, score tracking, and leaderboard management. - Built backend validation logic to ensure data integrity and prevent invalid score submissions.	
Full-Stack Developer Squarebucks Ordering System – C++	2022
- Developed a console-based ordering system handling end-to-end data processing, including user login, order selection, computation, and summary generation. - Implemented modular functions to manage application logic, simulate data persistence, and ensure clean program flow.	

SKILLS

Frontend Development: HTML, CSS, React.js, Bootstrap, React.js, JQuery Backend Development: C#, C++, Java, Python, JavaScript, PHP Database Management: MySQL, SQLite Version Control & Collaboration: Git, GitHub Tools & Platforms: Visual Studio Code, Unity, Android Studio, Jira, Microsoft Office, Google Workspace Testing & QA: Manual Testing, Basic Automated Testing, Robot Framework Other Concepts & Practices: System Analysis and Design, Object-oriented Programming, Object-Relational Mapping, RESTful API, Agile Methodology, UI/UX Design, Basic Animation Actively Learning: Node.js, Next.js, Express Soft Skills: Problem-Solving, Team Collaboration, Analytical Skills, Communication, Adaptability, Time Management, Attention to Detail, and Willingness to Learn

EDUCATION

Bulacan State University Bachelor of Science in Information Technology <i>Web and Mobile Development Specialization</i>	2022-2026 Magna Cum Laude
--	-------------------------------------

COURSE CERTIFICATIONS

Programming with JavaScript <i>Issued by Meta - October 2025</i> Gained knowledge about ES6+, DOM manipulation, asynchronous programming, and API integration.
Introduction to Front-End Development <i>Issued by Meta - September 2025</i> Learned core frontend principles including responsive design, HTML5, CSS3, and modern web development workflows.
Project Initiation: Starting a Successful Project <i>Issued by Google - September 2025</i> Developed skills in stakeholder analysis, project scoping, and risk assessment methodologies.
Foundations of Project Management <i>Issued by Google - September 2025</i> Gained knowledge about project life cycle, roles and responsibilities, planning, methodology (Agile, Waterfall), change control

ELIGIBILITY

Civil Service Professional Eligibility
Civil Service Commission – Philippines | March 2026
